Australian Lock Company
17 Doyle Ave
Unanderra NSW 2525

Attention: Garry Etchells, Managing Director

Dear Mr Etchells,

I am pleased to advise that the Security Construction and Equipment Committee have endorsed the ALCOM 5000 Series 127mm Mortice Lock as a Locking Device for Secure Areas with the following conditions:

- Must be fitted with lock cylinders endorsed for Secure Areas.
- Must be fitted with full plate furniture.

The endorsement is issued for the product as supplied and tested. If there are any changes in the product's design, operation or manufacturing processes, the supplier must contact the SCEC Chairperson to arrange for the product to be re-evaluated and possibly retested. Failure to do so may result in the product's endorsement being suspended.

For inclusion of the product in the next edition of the Security Equipment Catalogue, could you please provide an electronic image of the product, preferably in colour and in JPEG format.

Yours sincerely

A handwritten signature in blue ink, appearing to read 'Felix Pantaleo', with a large flourish extending to the left.

Felix Pantaleo
Chairperson
Security Construction and Equipment Committee
