

# BiLock Cylinder to suit Tradies Tool Box & Utility Lock

**Suits Gasweld Recess T Lock  
Or similar**

# The BiLock cylinder range of high security lock cylinders suit a myriad of applications that require optimum security with key restrictions.

**Part No. #7280BD (non key retained)**

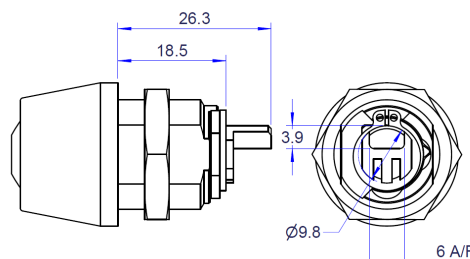

**Need more protection for your valuables, rather than use a low cost wafer lock, why not install the renowned BiLock locking system to your Tool Box or Utility.**

**Giving you that extra peace of mind!**

## Security Advantages

- ◆ BiLock cylinders are SCEC endorsed.
- ◆ Strong legal protection with a standard patent.. This standard patent provides the highest level of legal protection available.
- ◆ Specialised (unique) proprietary key cutting and forming equipment supplied to accredited BiLock agents only.
- ◆ Virtually impossible to pick, bump, rap or read codes through the keyway.
- ◆ All 12 pins are equal length, chisel shaped & contain false holes which must interact with two side bars simultaneously to operate lock.
- ◆ Dual bladed keyway is highly resistant to impressioning.
- ◆ Powerful master keying capabilities provide over 16.7 million real key combinations per key profile.
- ◆ Manufacturer's Guarantee and warranty.
- ◆ Quality Assured manufacturer with exacting tolerances.
- ◆ A huge range of compatible cylinder types is available to suit most hardware on the market today.
- ◆ BiLock's 8,000 key head colour combination options ensure our systems provide easy visual key identification.
