The Industry's Most Recognised
High Security Master Key System,
Now Even Better

Recognisable. Trusted. Proven.

Trusted security since 1980 — built for the future

For over 30 years, BiLock has been a market-leading choice for high security applications, trusted across some of the world's most demanding environments.

Installations span the Royal Australian Mint, international airports, Las Vegas casinos, Bank of America, as well as military, government, industrial and civic sites of all sizes.

BiLock has been recognised to the highest standards, including endorsement by the Australian Government's security authority, the Security Construction and Equipment Committee. This level of protection is available to your organisation, delivering true flexibility, scalable master keying, and outstanding long-term value.

The Star - Sydney

Now Even Better: BiLock Exclusive

BiLock Exclusive represents the next evolution in high security master key systems.

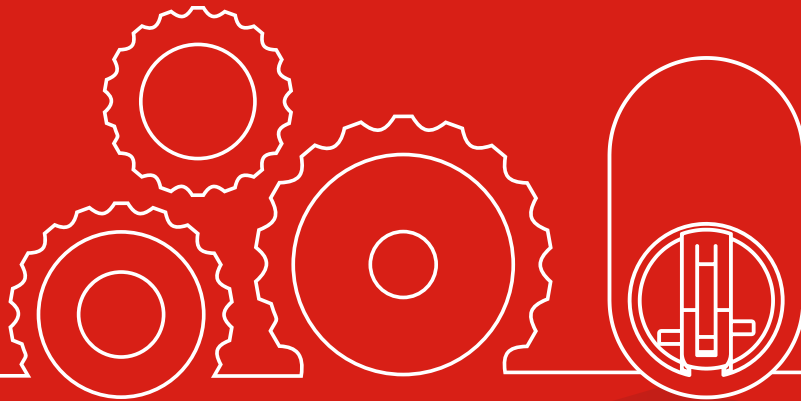

The addition of the 14th and 15th locking elements enhances an already extensive 16.8 million key combinations, introducing two additional layers of unique coding to further strengthen system security.

With strictly controlled, factory-allocated key codes, BiLock Exclusive delivers exceptional key control, significantly reducing the risk of unauthorised duplication while maintaining the integrity of even the most complex master key systems.

Backed by a 20-year patent, the system is protected against imitation and replication, ensuring long-term security, scalability, and confidence for your organisation.

Seamless Integration for New Installations and Retrofits

A key advantage of the BiLock system is its versatility - designed to work across virtually any lock within your organisation, including most existing hardware.

This enables streamlined access control, reducing the need for multiple keys while improving overall system efficiency.

Applications span a wide range of lock types, including door locks, padlocks, switch locks, rim cylinders, mortise cylinders and cabinet locks, delivering a consistent, high-security solution across your entire site.

BiLock Exclusive is fully scalable, allowing your system to grow with your organisation. Existing BiLock installations can also be easily upgraded, ensuring continuity while enhancing security.

Instant Core Change for Faster Security Response

Beyond its high level of protection, BiLock Exclusive offers a critical operational advantage - the ability to change lock cores instantly using the re-engineered next-generation Coded Quick Change Core (QCC) key (Patent 2013204530).

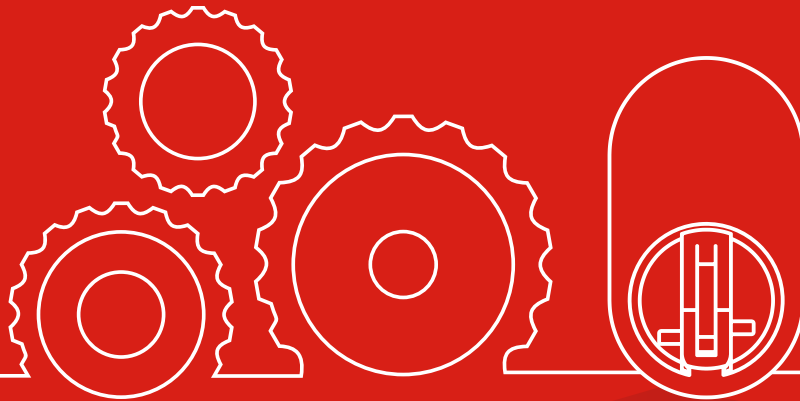

This rapid response capability significantly reduces the risk and duration of security breaches caused by lost keys or other incidents.

The result is stronger site security, reduced downtime, and lower servicing and maintenance costs, all while maintaining complete control over your system.

System Advantage

Quick Change Core (QCC) System

Advanced Protection Against Drilling, Penetration and Bumping

A high-tensile steel anti-drill barrier is incorporated as standard within BiLock Exclusive, providing enhanced resistance to drilling, penetration and bumping attacks.

This robust construction ensures compliance with AS4145.2, delivering reliable protection in demanding security environments.

Flexible Key Identification and Access Control Integration

23 keyhead colour options can be configured to create clear, site-specific key identification systems.

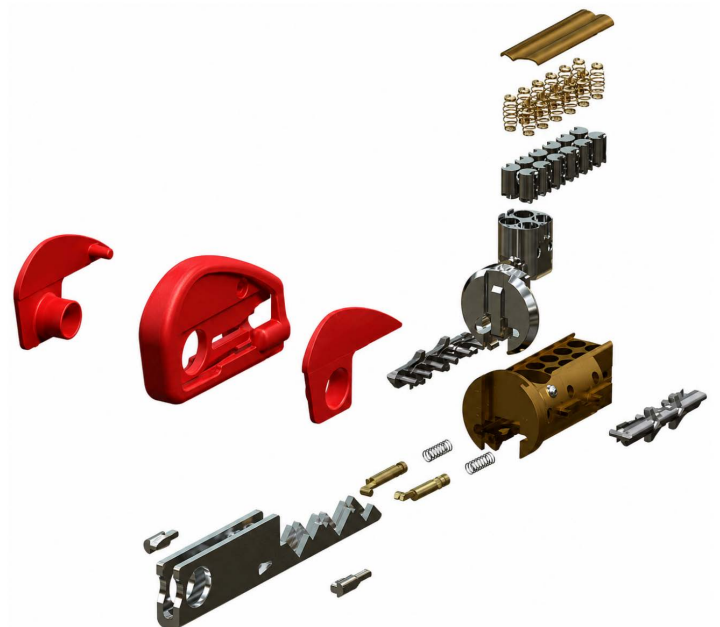

Keyheads are also available with integrated MIFARE® technology, allowing BiLock Exclusive to interface with electronic access control systems, combining mechanical security with modern access management.

Wide Service Network

Backed by a network of over 250 authorised agents, BiLock Exclusive is supported by experienced professionals for installation, servicing and ongoing system support.

This ensures consistent, reliable service across all locations.

TAKING AUSTRALIAN SECURITY TECHNOLOGY TO THE WORLD

✓ AUSTRALIAN OWNED ✓ AUSTRALIAN DESIGNED ✓ AUSTRALIAN MANUFACTURED ✓ QUALITY ACCREDITED

The Australian Lock Company has built a global reputation for high security solutions, driven by continuous innovation and a commitment to meeting the evolving demands of modern security environments.

Our products are trusted in some of the world's most critical applications, from major international airports and high-security government facilities to Olympic Games venues and leading financial institutions. They are also widely used across universities, hospitals, public infrastructure, and industrial and commercial sites of all sizes.

The distinctive design of the BiLock system has become a recognised benchmark in high security. Now, after more than 30 years and four generations of innovation, BiLock Exclusive represents the next evolution - delivering enhanced control, advanced protection, and future-ready performance.

MECHANICAL SECURITY - WITHOUT COMPROMISE. CONTROL - WITHOUT COMPLEXITY.
