

BiLock Exclusive delivers advanced mechanical security designed for today's most demanding environments.

What BiLock Exclusive Delivers

Combining proven technology with enhanced key control and system flexibility, it provides a scalable, high-performance solution that protects your organisation now and into the future.

HIGH SECURITY PERFORMANCE

- Advanced dual-axis locking technology for enhanced protection
- Resistance to picking, bumping, and forced entry
- Integrated anti-drill barrier for added defence

ADVANCED KEY CONTROL

- Factory-controlled key duplication
- Restricted key profiles for maximum security
- Maintains integrity across complex master key systems

EXTENSIVE KEYING CAPABILITY

- Over 16.8 million key combinations
- Additional locking elements for enhanced coding
- Suitable for simple to highly complex systems

BUILT FOR DEMANDING ENVIRONMENTS

- Trusted across government, infrastructure, and commercial sites
- Designed for long-term reliability and performance
- Compliant with high security standards

System & Operational Capability

QUICK CHANGE CORE (QCC)

- Replace cores instantly using dedicated QCC key
- No need to remove or replace full locksets
- Ideal for lost keys or security breaches
- Minimises downtime and disruption

SYSTEM-WIDE VERSATILITY

- Works across multiple lock types and applications
- Suitable for new installations and retrofits
- Enables a single, streamlined key system

ACCESS CONTROL INTEGRATION

- Compatible with electronic access control systems
- MIFARE® keyhead options available
- Supports hybrid mechanical + digital environments

SCALABLE & FUTURE READY

- Fully scalable master key systems
- Designed to grow with your organisation
- Long-term patent protection and system security

Why BILOCK Exclusive

- ✓ Mechanical security without compromise
- ✓ Proven performance across critical applications

- ✓ Control without complexity
