

GALAXY DELIVERS ADVANCED HIGH-SECURITY LOCKING ENGINEERED FOR MODERN MASTER KEY ENVIRONMENTS.

Combining restricted key control, sophisticated coding capability, and streamlined system management, Galaxy provides a secure and efficient solution for commercial, institutional, and high-security applications.

WHAT GALAXY DELIVERS

ADVANCED SECURITY PERFORMANCE

 Resistance to bumping, picking, and impressioning	 Tamper-resistant cylinder and key design	 Anti-pick carriage teeth and additional locking pins
 High-security anti-drill protection	 Precision manufactured for consistent performance	

MASTER KEY SYSTEM FLEXIBILITY

 Dedicated purpose-built key cutting machines for strict key control
 Extensive master keying capability for complex facilities
 Hidden coding features for additional master key protection
 Multi-axis locking design for enhanced system security
 Supports secure access hierarchy management
 23 colour key options for simplified identification

SYSTEM CAPABILITY & OPERATIONAL EFFICIENCY

EXPANSION & SYSTEM GROWTH

Galaxy is designed to support evolving facilities and growing organisations through expandable coding capability, programmable Codebars, and staged expansion without infrastructure replacement.

QUICK RECOMBINATION

- Recombine cylinders without removing from the door
- Simple Codebar replacement reduces downtime
- Fewer moving parts minimise maintenance requirements

RETROFIT & APPLICATION VERSATILITY

- Suitable for new installations and retrofits
- Compatible with a wide range of lock applications
- Trusted across commercial and institutional environments
- Ideal for hospitals, schools, retail, hotels, and government facilities.

ENGINEERED FOR DURABILITY

Stainless steel impression-resistant keys

Lifetime guarantee against key breakage

Tested to 500,000+ operational cycles

WHY GALAXY

- ✓ Advanced mechanical security
- ✓ Restricted key control without compromise
- ✓ Efficient master key system management
- ✓ Designed for demanding environments
- ✓ Proven reliability across critical applications
